

Centrally-managed total protection for your Microsoft small business network – so you can get on with business

The Internet is today's Wild West. It's a highly complex environment that's rife with opportunities for less-than-ethical individuals and entities ready to take advantage of innocent explorers. Every new web-based technology that appears will be followed almost immediately by bad guys who've figured out how to exploit that technology to their own ends.

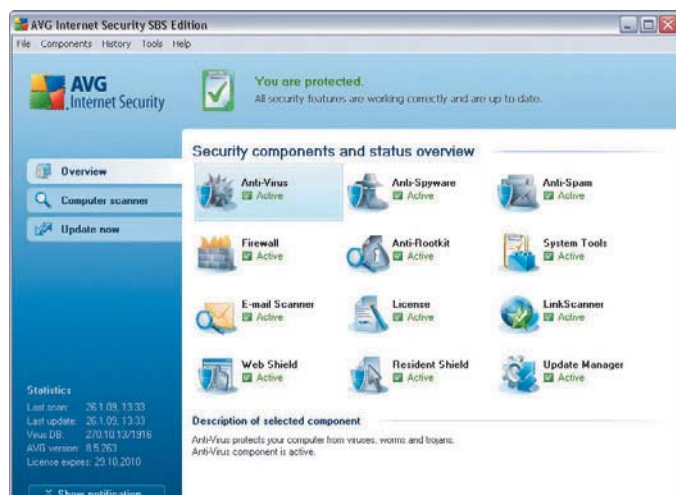

Why your business needs an extra layer of protection

These bad guys operate in a completely different way than the teenage graffiti artists who were the mainstay of virus-creation for so many years. Today's cybercriminals are running businesses designed to do damage and steal data; they do this by creating websites that deliver malicious software, are typically active for no more than a day before being replaced by a different site. They may also deliver infections through temporary "poisoning" of legitimate websites.

Fear not. AVG Internet Security SBS Edition will protect your business against these 'here today, gone tomorrow' threats as well as viruses, spyware, trojans, worms, rootkits, and spam. AVG Internet Security SBS Edition gives you powerful, easy-to-use protection that works efficiently and unobtrusively in the background for end users, with easy deployment and central administration for you or your IT staff.

Unique LinkScanner Protection

AVG's Active Surf-Shield and Search-Shield protect in real time against malicious web pages, zero day exploits and drive-by downloads. Other programs rely on static databases and cannot protect you at the only time that matters – the time a user clicks on a link. When users search using Google, Yahoo, or MSN, if the results include web pages that contain malicious code, AVG simply blocks the page so they can't accidentally infect the network. Other questionable or suspicious sites are flagged with an alert to show the degree of risk on the page.

AVG Internet Security SBS Edition gives your business comprehensive complete, real-time protection against the latest web-borne threats:

- Comprehensive protection for today's stealthy threats:
 - Real-time safe searching and surfing for safe online employee activity
 - Advanced protection against new and unknown viruses
 - Download files from the web and exchange files over instant messaging without the risk of malware infection
 - Streamlined malware detection quickly and efficiently prevents infection from known spyware, viruses and worms
 - Self-learning, personalized anti-spam keeps inboxes free of junk and phishing attacks
 - Smart firewall quietly and efficiently keeps hackers at bay
 - Advanced anti-rootkit technology defuses even the most complex techno smart bombs
 - Emergency protection service whenever a new threat appears
- Automatic update service for continuous protection
- Fast, effective performance without slowing systems down
- Works in the background – doesn't get in the way of employee productivity
- Fast-response customer support and service around the world and around the clock

Every part of your network is protected

AVG Internet Security SBS Edition provides full protection for all areas of your network;

- Workstations
- Laptops
- File servers
- Exchange servers
- SharePoint portals

Tough on Threats. Easy on You.

AVG's management features, AVG Admin and AVG Admin Lite, ensure you can easily and efficiently protect your business against cyberthreats without disruption or system slowdown.

Tough on Threats

- Blocks poisoned web pages in real time – no delays or missed infections
- Detects and removes viruses, spyware, rootkits, worms and Trojans – no malware-induced downtime
- Protects against exploits and drive-by downloads that invisibly and automatically download dangerous content to users' computers – surf the web with confidence
- Prevents suspicious files from being opened – no more accidental infections
- Automatically quarantines or removes infections – infections can't spread across the network

AVG INTERNET SECURITY SBS EDITION

Tough on threats. Easy on you.
